

## **Important Implementation Results of October 2018**

### **Toxic and Chemical Substances Bureau,**

### **Environmental Protection Administration, Executive Yuan**

1. The primary evaluation results of the “1<sup>st</sup> Green Chemical Creativity Contest for Colleges and Universities” were published on October 8. A total of 46 works, including 21 in the category of teaching materials and experiments and 25 in the category of culture and creativity, were submitted in this competition. Review in the preliminary evaluation is now in progress and the decision of who will enter the finalists of the contest will be announced according to the evaluation results.
2. The “ChemiCloud - Inter-ministerial Chemicals Information Service Platform” meeting took place on October 24. All relevant departments and agencies were invited to discuss the possibility of standardizing data transmission; investigation on the sharing of application data; requirements for interviewing fire-fighting agencies; promotion of the customization function; and food safety flow, section and chain.
3. “2018 Taiwan-Southeast Asia Regional Cooperation Study and Training Program” took place from October 15 to 19. This event not only provided toxic chemical emergency response personnel of Southeast Asian countries with the opportunity of training and studying in Taiwan, but also further developed trainings and capabilities of Taiwan’s toxic chemical emergency response techniques.
