

What are the differences before and after revising Toxic Chemical Substances Transportation Management Regulations?

Answer:

1. The delivery forms are divided into general transportation form and the simple transportation form.
2. The small amount of transportation is included in the management (solid substances under 200 kilograms, liquid under 100 kilograms, and gas under 50 kilograms) and is subject to the simple transportation.
3. The transportation forms are reduced from 6 duplicate and various forms to one form.
4. The instant tracking system, including the departure and destination information, emergency function (SOS button, clinometers and so on), and also the 4G Internet service to enhance the report efficiency of the toxic chemical substances transportation hauler is added to strengthen the disaster prevention and response of the transportation hauler.
