

Important Implementation Results of September 2019

Toxic and Chemical Substances Bureau

Environmental Protection Administration, Executive Yuan

1. Promulgated amendments to the “Toxic and Concerned Chemical Substances Control Act Enforcement Rules” on September 3.
2. Held “2019 Observation Tour of Japan’s Chemical Disaster Professional Training and Response Drills” from August 31 to September 6 to strengthen Taiwan’s toxic and chemical disaster response capacity and equipment readiness; and to enhance disaster response personnel’s drill plans for large-scale disaster drills and practice related thereto.
3. Held “Nitrous Oxide Management Mechanism Conference” on September 26. The Industrial Development Bureau and Taiwan Food and Drug Administration were invited to discuss and clarify regulations governing government agencies’ use of nitrous oxide, stages of control operations, control targets at each stage, control tools, and penalties. The purpose thereof is to facilitate cooperation among governmental departments and agencies, and to facilitate the management of nitrous oxide effectively.
