

Achievements of the Environmental Protection Administration, the Executive Yuan in November 2020 (Toxic and Chemical Substances Bureau)

- I. On November 3, the Environmental Protection Administration (EPA) promulgated the *Regulations on the Management of Emergency Responders of Toxic and Concerned Chemical Substances* to enhance the handling ability of operators in dealing with toxic and chemical incidents.
- II. From November 5, the TCSB conducted a total of 25 on-site inspections or interviews (10 in the individual category and 15 in the group category) for the 2nd Green Chemistry Application and Innovation Awards, and the 3rd review meeting was scheduled for December 8 and 16.
- III. On November 28, to help the public understand environmental agents and their safe use, the TCSB set up a booth for relevant activities and held a promotional campaign on the safe use of environmental agents in conjunction with the Chiayi County Government to expand the target audience and increase the effectiveness of the promotion.
