

Major Implementations of the Toxic and Chemical Substances Bureau, Environmental Protection Administration, Executive Yuan in February 2022

1. On February 14, the TCSB convened the 2020-2021 Review Meeting on Emergency Response Drills for Hazardous Chemical Incidents. Relevant ministries and departments of the Executive Yuan and local governments were invited to jointly review the results of the drills organized by the EPA Central Toxic Disaster Response Center and the nationwide toxic disaster drill co-organized with the Kaohsiung City Government in 2021, and to discuss the handling methods and planning of nationwide toxic disaster drills in the future.
2. The TCSB attended the 28th Asia-Pacific Economic Cooperation (APEC) Chemical Dialogue (video conference) from February 17 to 18, reporting and sharing Taiwan's announcement of concerned chemical substances and the extension of the registration period.
3. On February 25, the TCSB convened the Discussion Meeting on Joint Inspection of Hazardous Substance (Goods) Storage Sites and Information Interfacing. Relevant ministries and departments were invited to discuss issues such as "joint on-site inspection and checking operations of hazardous substance (goods) storage sites" and "information on hazardous goods storage sites and stored goods, real-time interfacing to the Chemical Cloud Information System."
