

Major Performance of Environmental Protection Administration, Executive Yuan in June 2022 (Toxic and Chemical Substances Bureau)

1. On June 22, the first preparatory and advisory meeting for the “3rd Green Chemical Application and Innovation Awards” took place. Experts and scholars were invited to provide advice and suggestions on the content of Instructions to Participants, including the award process, scoring categories, written and on-site reviews. The said advice and suggestions will be included in the draft Instructions to Participants for the 3rd Green Chemical Application and Innovation Awards and will be used as a reference for the Bureau.
2. On June 23, the proposal of “Restrictions on the Import of Detergents containing Nonylphenol and Nonylphenol Polyethoxy Alcohol” was discussed to evaluate the possibility of restricting the import of detergents that contain nonylphenol and nonylphenol polyethoxy alcohol and conducting joint management measures in accordance with the *Waste Disposal Act*.
