

Major Performance of the Chemicals Administration,

Ministry of Environment, in February 2024

1. On February 27, the Administration attended the preparatory meeting of the Ministry of Health and Welfare's "First Coordination Meeting of 2024 for Environmental Protection and Food Safety", where the Ministry of Agriculture proposed to discuss the "Plan for regulations on chemicals to combat dengue fever vectors, in relation to research on dissipation of residues on crops", which involves setting limits on pesticides and their residues.
2. On February 27, the Administration held a press conference on the results of the 2023 audit of environmental agents, and announced the results of the 2023 audit of environmental agent advertisements, labeling, counterfeit agents, and samplings of active ingredients, urging the public to purchase legal environmental agents and to refrain from selling and purchasing environmental agents on the Internet.
