

## Chemicals Administration of the Ministry of Environment

### Major Policies in June 2024

On June 11, the Administration amended and promulgated the "Permit Registration and Approval Regulations for Toxic and Concerned Chemical Substances", which stipulates that before applying for, changing or extending a permit for toxic and concerned chemical substances, an applicant shall firstly draw a schematic map of the whole plant or facility in terms of the flow of air, water, wastes, and the direction of the pollution flow of the toxic and concerned chemical substances, and that if this is related to the application for other types of environmental permits, modification, alteration, or extension of such permits, the applicant shall submit such applications at the same time.
