

Chemicals Administration, Ministry of Environment

Major Policy Implementations in August 2024

1. On August 2, in response to recommendations from environmental protection groups during their meeting with the President, the 'Multilateral Communication Forum on Rodent Control and Environmental Agent Management' was held. Environmental protection groups, governmental agencies, scholars, and experts gathered to jointly discuss measures to improve household rodenticide product management in order to reduce misuse and maintain biodiversity.
2. On August 6 and 7, the “Seminar on Integrated Reporting and Response Mechanisms for Toxic and Concerned Chemical Substance Disasters” was held. Head of the Executive Yuan Premier Cho Jung-tai was invited to deliver a speech and present awards to joint response teams with outstanding performance in handling toxic and concerned chemical substances. Themed around integrated disaster information reporting and response mechanisms, the seminar showcased the results of integration of interdepartmental information and advancements in AI technology for disaster prevention and relief, aiming to enhance prevention and preparedness capacity.
3. On August 15 and 16, the online session of the “2024 Green Chemistry Summer Camp” took place, with elementary school students from grades 4 to 6 to participating. The Chemicals Administration also extended invitations to students from offshore island schools, including Jhong Jheng Elementary School, Hupu Elementary School, and Sian An Elementary School in Kinmen County. A total of 44 participants took part in the event.
