

Chemicals Administration, Ministry of Environment

Major Policy Implementations in April 2025

1. On April 16, the Ministry of Environment (MOENV) participated in the 1st meeting of the “Food Safety Board” in 2025 chaired by Convener Cho Jung-tai of the Executive Yuan. During the meeting, the MOENV presented a report on “Industrial Pollution Source Monitoring,” an interdepartmental initiative that integrates monitoring mechanisms and data feedback as part of the government's management strategies. These efforts aim to safeguard the agricultural production environment and uphold food safety.
2. On April 21, the MOENV convened the meeting on “Hazardous Chemical Substance Management and Disaster Response Board” to track the progress of local governments' implementation. Taoyuan City and Changhua County, which have already established such meetings, were also invited to share their experiences.

3. On April 29, Director Hsieh Yein-rui held a press conference on the management, selection, and purchase of household pesticides and announced the 2024 inspection results of household pesticides. The MOENV also invited experts and scholars to discuss methods to prevent and control hazardous organisms in residential areas, promoting the correct concepts regarding the use of household pesticides.
