

## **Chemicals Administration, Ministry of Environment**

### **Major Policy Implementations in March 2026**

1. On March 11, a joint seminar titled “Facing Extreme Climate: Fire Prevention and Emergency Response for Waste Storage Sites” was held in collaboration with the National Fire Agency, Ministry of the Interior. The seminar focused on three core pillars—risk prevention, fire suppression, and environmental management. Using practical case studies, discussions covered risk identification, management guidelines, air pollution monitoring, and on-site environmental detection strategies, with the aim of enhancing fire prevention and emergency response capabilities at waste storage and landfill sites.
2. On March 24, the first inter-ministerial task force meeting for 2026 on the “Per- and Polyfluoroalkyl Substances (PFAS) Management Action Plan” was convened. The meeting served to update members on the latest international developments while coordinating the advancement of related management initiatives.
